University of National Excellence

The University won the 'University of National Excellence' award in 2013. A statement from the Ministry of Human Capacities, given with the award, reads: 'The government has established such a standardized scheme which acknowledges and supports those institutional performances that outstandingly contribute to the creation and preservation of the intellectual and economic value system of our nation. Pázmány Péter Catholic University is one of the representatives of such institutional excellence and therefore it is worthy of the title of University of National Excellence.'

Introduction

Pázmány Péter Catholic University (PPKE) is an accredited higher education institution run by the Catholic Church and governed by the Hungarian Catholic Bishops' Conference. The following characteristics help us to fulfil our goals:

- a broad curriculum in the field of humanities,
- rich pedagogical and psychological expertise,
- pioneering research and teaching of info-bionics,
- training prospective teachers of linguistic and ethnic minorities living in Hungary,
- developing interdisciplinary programs in various fields of study,
- improving international cooperation in all fields of science utilizing our skills and capacities.

PPKE operates and fulfils its ecclesiastical mission upon the Apostolic Constitution *Ex corde Ecclesiae*: *“Since the objective of a Catholic University is to assure in an institutional manner a Christian presence in the university world confronting the great problems of society and culture. (...) A Catholic University, therefore, is a place of research, where scholars scrutinize reality with the methods proper to each academic discipline, and so contribute to the treasury of human knowledge. Each individual discipline is studied in a systematic manner; moreover, the various disciplines are brought into dialogue for their mutual enhancement (...).”*

In keeping up with its Catholic characteristic, Pázmány Péter Catholic University serves the search for truth in all its aspects through the means of universal humanism, directing its teaching and research activities towards the enrichment of the Church, the development of Christian culture and human progress. In the search for truth, it emphasises the knowledge integration of various disciplines, the dialogue between faith and reason”, the ethical concern and the theological perspective. It assesses the results of science and technology “from the perspective of the totality of the human person” (cf. *Ex corde Ecclesiae* 4, 11, 15, 7).

The University subordinates its international activities to its mission, and aims to serve the national and international communities through its work, its achievements and the values it represents. To achieve its goals, it seeks to cooperate in common research projects and education among Catholic universities as well as with other private and governmental institutions”. It takes part in international associations of Catholic universities, thus contributing to ‘the life and mission of the universal Church’ (cf. *Ex corde Ecclesiae* 35, 27).

People-oriented, high-quality education, classical knowledge, and innovation – this is what Pázmány Péter Catholic University offers its students. Our multifaceted education system aims to convey the traditional knowledge and values necessary for the development of the human personality in its entirety.

Our underlying goal is to provide training that supports everyday life, as well as students in learning and recognizing the related theoretical knowledge. We have a long-standing tradition of teaching a range of disciplines and disseminating valuable knowledge in theology, legal sciences, humanities, social sciences, information technology and bionics.

The Catholic roots and intrinsic human and social values of PPKE determine the mission of our Budapest-centred institution. Our approach consists of mutual respect, building intergenerational professional and friendly communities (from secondary schools to alumni), and helping each other. Our social programs draw an increasing number of students each year.

Knowledge is transferred in a people-oriented environment, always taking into account the capabilities, skills and needs of the students. The University pays particular attention to the importance of high quality science and education – even in international comparison. We are convinced that these universally recognized values guarantee that the degrees we issue maintain their value and the favourable reception of our graduates in the labour market.

10 facts about us

We are one of the oldest universities in continuous operation. **Founded in 1635** and re-established in 1992, PPKE combines traditional values of care for our students with flexible curricula, resulting in an environment of **high professional level** and **inspiring atmosphere**.

Sciences of the 21st century

Study programs at the Faculty of Information Technology and Bionics uniquely combine life sciences with the latest developments of information technology.

Excellent in Hungary

We received the “University of National Excellence” award in 2013.

Personal connection during your studies

We aim to provide extensive care to each and every student.

World-renowned professors

Several of our staff members are often invited to universities abroad and are considered excellent in their field of research and scientific area.

Strong buddy system

We aim to pair every incoming student with a Hungarian of the very same division, so students will have all the help they need during their stay in Hungary.

Extensive international relations

Based on the international relations of our university and the researchers lecturing at our faculty, we have succeeded in building active contacts with several internationally reputed university research centres.

Excellent job opportunities

After graduation in their chosen field of innovation area, our students find that their diplomas will open many doors.

Collaboration in research

Study and research in *The Ányos Jedlik Laboratories*, fitted for multidisciplinary research of Bionics, Biotechnology, Nanotechnology and Microelectronics, or conduct research of Humanities in *Psychological Research Laboratory* or the state-of-art *Archaeological Geoinformatical-System Laboratory*; or *Competition Law Research Center Hungary*; *Ereky Public Law Research Center*; *Law and Language Research Center*; *Media Law Research Center*; *Intellectual Property Law Research Center*.

Located in the heart of Hungary

Enjoy the sight and opportunities of the capital city in the centre of the country.

Statistics

2022 / 2023 Study Year

PPKE in National University Rankings

2nd place – university teaching excellence (by percentage of academics with academic degrees) statistics by HVG, Hungarian weekly economic and political magazine (2023)

2nd place in the field of Pedagogy (based on teaching excellence) – statistics by HVG, Hungarian weekly economic and political magazine (2023)

7th place in the ranking of Hungarian higher education institutions – statistics by HVG, Hungarian weekly economic and political magazine (2023)

2nd place in the field of Law (based on student excellence) – statistics by HVG, Hungarian weekly economic and political magazine (2023)

1st place – faculty teaching excellence for the Faculty of Information Technology and Bionics (in terms of percentage of teaching staff with an academic degree) – statistics by HVG, Hungarian weekly economic and political magazine (2023)

7th place in the field of engineering sciences (based on teaching excellence) - statistics by HVG, Hungarian weekly economic and political magazine (2023)

Pázmány Péter Catholic University nurtures a vast network of international relationships in Europe and around the world. This network guarantees diverse options in partnerships – be it mobility, research, project application, joint education or other activities. The University has over 400 inter-institutional agreements with various countries around the globe.

Central European Exchange Program for University Studies (CEEPUS)

- CEEPUS covers mobility grants for students and teachers in the frame of university networks
- PPKE is an active partner in five operating networks in 2022/2023

Erasmus+ KA131

- European Union Program, which provides learning mobility opportunities between program countries for students, teachers and staff
- PPKE has 185 bilateral agreements with European universities
- Our biggest partners of exchange are French, German, Italian, Polish, Spanish and Portuguese universities

Erasmus+ KA171 International Credit Mobility

- Starting from 2016 PPKE established ties with several universities worldwide within the Erasmus+ International Credit Mobility program
- European Union Program, which provides learning mobility opportunities between program countries and partner countries for students, teacher and staff
- Partner countries include Armenia, Ecuador, Iraq, Israel, Jordan, Lebanon and Syria

Erasmus+

Erasmus KA220

- The Faculty of Information Technology and Bionics is a partner in an Erasmus+ KA220 Cooperation Partnership project, namely 'Introduction of joint short-cycle ICT courses for better employability of students and graduates'
- There are five partner universities from Croatia, Greece, Serbia and Poland

Joint Master's Degree

The two-year joint Master's program in Image Processing and Computer Vision (IPCV) is run in collaboration with the Autonomous University of Madrid and the University of Bordeaux.

Scholarship Programme for Christian Young People (SCYP)

The core mission of the SCYP is to provide opportunities to pursue higher education studies in Hungarian host institutions for Christian youth living in crisis regions of the world or being threatened in their countries because of their faith. The Scholarship Programme for Christian Young People (SCYP) was founded in 2017 by the Government of Hungary.

- Providing the possibility of studying in Hungary for young Christian students living in the crisis regions of the world and/or being threatened in their country because of their faith
- Incoming mobility from Armenian, Iraq, Kenya, Lebanon, Nigeria and Syria
- The scholarship covers tuition-free education, a monthly stipend, accommodation contribution reimbursement of travel costs and medical insurance

Stipendium Hungaricum

Founded in 2013, the Stipendium Hungaricum is the Hungarian Government's most prestigious higher education scholarship programme, offering a wide range of courses for high-achieving international students. It is available on five continents in over 90 countries, attracting tens of thousands of international students each year.

- The program is based on bilateral educational cooperation agreements signed between the Ministries responsible for education in the sending countries and Hungary
- Available for Bachelor, Master, One-tier Master, Doctoral and Non-degree Programs
- Incoming mobility to PPKE includes Afghanistan, Algeria, Azerbaijan, Brazil, Cambodia, Columbia, Ecuador, Ethiopia, India, Indonesia, Iraq, Jordan, Kazakhstan, Kenya, Kyrgyzstan, Korea, Kosovo, Laos, Lebanon, Mexico, Mongolia, Montenegro, Morocco, Nigeria, Pakistan, The Philippines, Russia, Serbia, Syria, Tunisia, Turkey, Turkmenistan, Ukraine and Vietnam
- The scholarship covers tuition-free education, a monthly stipend, accommodation contribution, and medical insurance
- More than 100 scholarship holders at PPKE

Hungarian Diaspora Scholarship

The program was established by the Hungarian Government for those who live in a Hungarian diaspora outside of Europe and wish to study at a Hungarian higher education institution to develop their personal, professional and cultural relations to Hungary.

- As a Diaspora Scholarship holder, you can receive an internationally recognised degree and acquire highly competitive knowledge to advance both personally and academically
- An excellent opportunity to build your professional network and discover everything about the country in a supporting and welcoming student environment
- The scholarship covers tuition-free education, a monthly stipend, accommodation contribution and medical insurance.

Bachelors, Masters and Doctoral study programs available for scholarship holders:

History (BA/MA/PhD), International Relations (MA), Archaeology (MA), Political Sciences (MA), Psychology (MA), Info-bionics Engineering (MSc), Computer Science Engineering (MSc), Medical Biotechnology (MSc), Doctoral programmes of the Roska Tamás Doctoral School of Sciences and Technology in three disciplines: Information Science (PhD), Electrical Engineering Sciences (PhD), Biological Sciences (PhD)

Memberships

Our international relationships primarily consist of the European Federation of Catholic Universities (FUCE), the International Federation of Catholic Universities (IFCU) and a regional cooperation initiated by the PPKE among universities from countries of the Visegrad Plus group. PPKE is also a member of the European Association for International Education (EAIE).

Degree Programs offered in English at our University

Bachelor

- English and American Studies
- History

Master

- Archaeology
- Catholic Canon Law
- Computer Science Engineering
- English Studies
- History
- Image Processing and Computer Vision
- Info-Bionics Engineering
- International Relations
- Medical Biotechnology
- Political Science
- Psychology

PhD

- Doctoral School of History
- Doctoral School of Sacred Theology
- Doctoral School of Linguistics
- Roska Tamás Doctoral School of Sciences and Technology

Postgraduate specialist training course

- Biodata Analysis Online PgCert
- Combating Cybercrimes, Corruption and Money Laundering
- EU Law and Litigation
- European Law
- Corporate Compliance

Our Laboratories and Research Centers

The Pope Saint John Paul II Research Centre

International Canon Law History Research Centre

Archaeological GIS (Geographic Information System) Laboratory

Laboratory for Psychological Research

3D Image Processing and Stereography Research Group

The Ányos Jedlik Laboratories (Science-Education-Technology Centre)

Competition Law Research Centre – Hungary

Ereky Public Law Research Centre

Law and Language Research Centre

Media Law Research Centre

Intellectual Property Law Research Centre

Student Services and Community Programs

Orientation week

At the beginning of every semester PPKE organizes a week of cultural and informative activities for its incoming students. This is a wonderful opportunity for the students to meet their fellow international students, to get to know the campus and the staff members, to learn some information about the following semester, to participate in various activities, such as enjoying traditional Hungarian folk dance or just to see the scientific wonders happening in our labs.

Mentor system

PPKE maintains a diverse mentor system: all international students can have a perfect buddy during their time in Hungary. We aim to pair incoming students with one of the Hungarian students studying in the same division, so they surely know their way around. Mentors can help international students in managing their daily life in the University as well as in everyday life. They also organize various cultural events, concerts or sightseeing tours all over Hungary during university breaks.

Sport facilities

While having sports facilities in the Faculty of Information Technology and Bionics, the Faculty of Humanities and Social Sciences and the Faculty of Law, PPKE also offers discounts from the local gyms.

Library

International students can get a pass for each faculty library. In addition, our inter-university agreements enable our lecturers and students to use two renowned libraries in Budapest, of ELTE and Sapientia College of Theology of Religious Orders. Students of ITK also have access to the Semmelweis University Central Library. Students of Pázmány are allowed to use the collections and services according to the host institutions' regulations. Two of the biggest national libraries are located very close to the University: The Metropolitan Ervin Szabó Library and the National Széchényi Library.

Student Services and Community Programs

Housing

In the process of finding suitable accommodation, our mentors will assist the international students.

Hungarian language course

We are happy to support international students with free Hungarian language courses. This is a great opportunity to study with their peers and get closer to the locals, and maybe read a book in Hungarian!

Intercultural Evenings and Day-Trips

PPKE supports the organization of intercultural evenings, where students can cook their traditional food and show videos of their country to their peers. The university also offers day-trips to the country in order to get to know the country and each other better.

Official email address for students

Students of PPKE receive their official e-mail address while they are in Hungary.

Freshman Picnic

Fresher Picnic is the first meeting before Freshman Camp. It is usually organized by the Student Unions and it is a great opportunity for students to ask questions and advice from their senior peers in an informal and relaxed atmosphere.

Freshman Camp (at the moment only in Hungarian)

This is a three- or four-day camp for first-year students with mindful and creative events and some useful practical information for life at the University. The students may test their skills in team-building games and tasks. It is one of the first events where the participants can make friendships that will last for a lifetime.

Student Community Programs

Freshman Ball

The Faculties when they have the opportunity organize an elegant and prestigious event when all the students wear their most fancy dresses while having fun and enjoying the party which is always accompanied by game of tombola, ball opening waltz and the election of the beauty queen of the ball. The invited performers and popular entertainers do their best to make the ball memorable.

Department evenings and trips

Most departments organise a Department Evening and Trip once a year to help students find out more about their fellow students and meet their lecturers in different situations.

Pázmány Day

Held in honour of Péter Pázmány, the founder of our University, this ceremony involves the delivery of Pázmány Awards and PhD degrees.

Opening Party

This is the very first event of each academic year to help students find their way back to university life after their summer holidays. The Opening Party is usually preceded by Information Day, which provides students with key information about the University.

Pázmány Cultural Talk Show

The monthly Pázmány Cultural Talk Show is a series of informal chats with public figures, artists, and athletes who, due to their lives or work, may lend a fresh perspective to the students with their reflections. The Show sometimes includes a table football competition as well.

The Pope Saint John Paul II Research Centre

The Pope Saint John Paul II Research Centre was established in 2020. The aim of the Research Centre is to contribute to the research work of PPKE in the search for truth, the preservation of knowledge and its transfer to the benefit of society, complementing the research carried out in the faculties of PPKE in a subsidiary manner. In its research, it seeks to integrate knowledge, to dialogue between faith and reason, to take into account the ethical aspects of the subject of research and to present its theological perspectives (cf. Ex corde Ecclesiae I, 35 and 30). The Centre will pursue these objectives through the production of scientific publications, the translation of scientific textbooks, the organization of conferences and the dissemination of scientific knowledge.

The Centre operates under the direct authority of the Rector. The Rector may delegate his management powers to a Deputy Rector or another person with an academic degree. In addition to the existing Research Groups, the Rector may establish additional ones to study serious contemporary problems, their roots and causes, their ethical and religious dimensions (cf. Ex corde Ecclesiae I. 32). Within the Centre, there are research institutes and research teams.

The three research institutes located within the Centre are: 1) Viktor Frankl Research Institute; 2) Institute for Economic Development and Small Business Research and Training; 3) Institute for the Integrity of Creation.

In addition, thirteen Research Groups support the scientific work of the Research Centre: 1) Christian Philosophy Research Group; 2) Catholic Mysticism Research Group; 3) 'From Just War to a Culture of Peace' Research Group; 4) Paulus Hungarus Working Group on Moral Theology; 5) The Church of Christ in History Research Group; 6.) 'Sustainable Agriculture - in harmony with the created world' Research Group; 7.) From Local Communities to the City of God Research Group; 8.) Christian Pedagogy and Psychology Research Group; 9.) Biblical Research Group; 10.) Ut Unum Sint Ecumenical Research Group; 11.) St. Thomas Research Group; 12.) Practical Philosophy Research Group; 13.) Rural Development Research Group.

Faculty of Humanities and Social Sciences

The Faculty of Humanities was opened in Budapest in 1992. It moved to its campus in Piliscsaba in 1994, and established a separate venue for certain Master's and later Bachelors programs in Budapest in 2012. Due to the increasing significance, and numbers of programs in social sciences, our Faculty was renamed Faculty of Humanities and Social Sciences in 2012 and moved back to Budapest.

The former Vitéz János Faculty located in Esztergom was integrated into our Faculty as the Vitéz János Centre for Teacher Training in 2013. The Faculty attaches great importance to the training of future teachers.

At the faculty there are over 40 Bachelor and Master courses in the fields of humanities, social sciences and economics, ranging from Hungarian and several foreign languages to history, art history, philosophy, aesthetics, psychology, sociology, international studies and more. This gives the advantage of diversity, which proves that Pázmány is a unique university in Hungary. It offers different environments and atmospheres for those who want to master an area in the arts and social sciences.

The Faculty offers accredited doctoral training in two academic fields: Linguistics, Literary and Cultural Studies and History.

Faculty of Humanities and Social Sciences

Campuses

Sophianum (Budapest)

The major administrative location and venue of events of Pázmány's Faculty of Humanities and Social Sciences, is in downtown Budapest. Sophianum is home to the offices of the Faculty including the Dean's Office, Directorate of Finances, Registrar's Office, International Office, Department of Scientific Management etc. The building also serves as the location of doctoral and lots of extra-curricular and scientific events throughout the academic year.

Danubianum (Budapest)

Our major building of education is on the other side of the Danube, but only in a twenty-minute distance from Sophianum. Except from the doctoral events, all our educational activities take place here, and all related offices can be found in Danubianum, including the Student Union.

Iohanneum (Esztergom)

The main field of specialisation in Esztergom is teacher education. Future practitioners of two important professions, kindergarten and primary school teachers are trained there. The main building, Iohanneum, has a unique location: it is in downtown Esztergom, next to the River Danube and the Cathedral. Esztergom, though a mid-sized town now, has a unique position in Hungary: it has been the seat of the Catholic Church for over a thousand years. More precisely, the Esztergom Cathedral is the seat of the Catholic Church and of the cardinal-archbishop in Hungary. For a few hundred years, it was also the coronation town.

The Faculty of Theology is the eldest School of the Pázmány Péter Catholic University, it has been created at Nagyszombat in 1635. As a Theological Institution, it dedicates its activity to the so-called 'sacred sciences', which mean different Fields of Theology, Christian Philosophy, Biblical Studies, Patristic Studies, Ecclesiastical History and Canon Law.

The Institute introduces students to these scientific fields and independent research practices through instructional levels which have received recognition by the Holy See and also by the Hungarian State. Therefore, our graduates can begin their ecclesiastical carrier with highly-valued special experience within the wide activity of the Church institutional system. They will be able to enrich, with their own scientific results, the Science of Theology in Hungary on an international level as well. This is served by the undivided (5 years) Theological program and the Theological PhD instruction which is unique in Hungary.

The well-known and widely-respected teaching faculty, approved by the Holy See, is guaranteed to produce work and education of the highest quality. This esteemed faculty has prepared two unique specializations in international cooperation for 2016, in Patristic and Biblical Studies.

Canon Law Institute

The Canon Law Institute “*ad instar facultatis*” was established in 1996. This Institute with “Faculty Rights” works on the profound scientific instruction of experts in the own internal law of the Catholic Church, which is unique within this geopolitical region. The Institute, through exceptional teaching, promotes and unifies the activity of the Ecclesiastical Tribunals on High Level not only in Hungary, but also in other neighbouring countries (i.e. Serbia, Slovakia, Romania, and Ukraine).

Our Institute has placed, from the very beginning, a significant emphasis on internationally-recognized and highly-valued scholarly research, exemplified by the different forms of publications of new results. Globally respected and recognized members of our faculty make these activities possible. Their work is a clear testament that the Canon Law Institute “*ad instar facultatis*” of the Pázmány Péter Catholic University has unquestionably reached the excellent level of some of the best old and traditional Pontifical Canon Law faculties “*in Urbe*”. It is one of the reasons why many people from different countries are looking forward to receiving our diploma and scientific degrees.

Faculty of Law and Political Sciences

The Faculty of Law and Political Sciences of the Pázmány Péter Catholic University is an eminent law school in Hungary. It was established in 1995.

Our downtown Budapest building is a great place for our students to study and connect with fellow peers. Our faculty members seek to advance knowledge in a search for truth to explore the relationship between law and social justice.

Pázmány professors are influential legal scholars and enthusiastic classroom teachers. With diverse backgrounds as practicing attorneys, policymakers, judges and interdisciplinary experts, their wide-ranging work contributes to the community and enriches the classroom experience.

Our Deák Ferenc Institute is a market leader in offering post-graduate courses in Hungarian and in English. At graduate level, about 50 courses are offered in English to our international and Hungarian students.

Faculty of Information Technology and Bionics

At the Faculty of Information Technology and Bionics (Pázmány ITK) we teach and research the technology of the 21st century.

Since our foundation in 1998 the study programs of Pázmány ITK in electronic and computer engineering are combined with life sciences such as molecular and neural biology and medicine. We strive to understand techniques and algorithms developed in biological systems, in order to implement them in engineering environments.

Our Faculty fosters innovation, research, and exciting cooperation with other universities and research labs at all levels of education, from Bachelors to Doctoral degree.

Our study programs reflect our interdisciplinary approach, and are taught by academics with leading expertise in their relevant scientific area. Students have access to cutting-edge facilities and resources, getting the tools needed to reach their full potential. Teachers, administrative staff, laboratories, and fellow students offer collaborative support to help international students to safely and comfortably settle into life in Hungary.

All of our Masters and PhD programs are run in English. In addition to these, the Faculty also offers a high-quality, two-year Joint Master's Degree in Image Processing and Computer Vision, run in collaboration with the University of Bordeaux (France) and the Autonomous University of Madrid (Spain).

Our research areas include, among others, artificial intelligence, bio-inspired computing, cognitive science, language technology, human-computer interaction and many more.
