

Dear Pázmány Global Alumni Members,

Warm greetings from the Pázmány Alumni Team! We are pleased to share with you the latest edition of our international alumni newsletter, bringing you updates, events, and community news from across the global PPKE network. First, we would like to extend our heartfelt congratulations to all international students who graduated in February. Welcome to the Pázmány Alumni community – we are delighted to celebrate this milestone with you! We also remind our alumni that the Pázmány Card mobile application is available and continuously expanding its services. Through the app, you can access a growing range of benefits, opportunities, and community features designed to support your professional and personal connection to the university. We hope this newsletter helps keep you informed and strengthens the bonds within our international alumni community.

GRADUATION CEREMONIES AT PÁZMÁNY PÉTER CATHOLIC UNIVERSITY

In February, students, lecturers, families, and friends gathered for the graduation ceremonies held at the Faculty of Information Technology and Bionics and the Faculty of Humanities and Social Sciences. A large number of graduates received their diplomas at the events, including both Hungarian and international students. **We warmly congratulate all our new graduates and wish them every success in the next chapter of their journey.**

PPKE delegation visited St. Mary's University College in Belfast

A delegation from PPKE recently visited Belfast, where they visited our Catholic partner institution, St. Mary's University College, as part of the growing international cooperation between the two institutions. During the visit, delegation members held discussions with Prof. Peter Finn, College Principal, during which they reviewed common strategic goals and future opportunities for cooperation. Key topics included the social role of Catholic higher education, as well as current European trends and best practices in teacher training.

Allonic: from Pázmány ITK to the forefront of the world

It started as a university project and became an international breakthrough in robotics. Benedek Tasi, a former student of our Faculty, and his team developed a bio-inspired manufacturing technology that could fundamentally transform robotics. Allonic now works with the world's leading engineers, while its roots go back to the creative, experimental environment of Pázmány ITK.

Living, Learning, Belonging: IPCV Students in Budapest

Imagine 21 students from 15 countries, all in one city, learning, exploring, and navigating life in Budapest together. That's the IPCV cohort who began their studies in September 2025. Students shared highlights from their first semester at Pázmány ITK: late-night coding sessions, library marathons, surprises by the Parliament, and unforgettable cohort moments. As they prepare for their upcoming semester in Madrid, they reflect on friendships, growth, and the many small moments that made Budapest feel like home.
