2021, Anikó Dudás

# What is open access (OA)?

Under the OA model, an article is

- ▶ made immediately available online when published,
- ▶ It is free to read for anyone in the world, rather than only to subscribing readers or institutions.
- ▶ The article is made available under a Creative Commons CC-BY license,
- ▶ CC-BY licence allows for anyone to reuse, share, or build upon the work

# Advantages for researchers OA articles are...

immediately  
accessible and  
highly  
discoverable

cited more than  
non-OA articles

downloaded more  
often

attract more  
attention

editorial rigour is  
same or even  
grater than in  
non-OA publishing

Unfortunately... publishing under Open Access license is usually not free,  
you must pay an Article Processing Charge (APC)

# EIS - programme

- ▶ PPCU is a member institution of EIS - Electronic Information Service - Hungarian National Programme
- ▶ EIS - its mission is to purchase and make available essential electronic information resources for higher education and scientific research.
- ▶ *Read and Publish* agreements cover APC (Article Processing Charge) costs for authors affiliated with the participating institutions
- ▶ Pázmány Péter Catholic University (PPCU) is a member of EIS
- ▶ Thus our researchers, PhD students are eligible authors to benefit from EIS agreements.

# How to publish without APC-fee?

- ▶ If your university has arranged a deal that allow for open access publishing (free of charge) for corresponding authors affiliated with University, than you have not to pay APC.
- ▶ *Read and Publish* agreements cover the cost of publishing in the journals included in the agreements.
- ▶ **Article Processing Charges (APCs )**: Not all of the journals in agreements allow for fully open access publishing!
- ▶ Check for subscribed databases at PPCU under [Open Access agreements](#)
- ▶ Check OA-title lists provided by EIS-office  
<http://eisz.mtak.hu/index.php/en>

# Requirements for free OA-publishing

The author or a co-author should be affiliated with PPCU

affiliated author must be the corresponding author

Other requirements that might be different by journals and publishers

# 7 publishers - opportunities for PPCU-affiliated researchers
